## *Keg Washing, Sanitizing & Filling Squire 'Plus Washer' System*

The IDD semi-automatic keg washing and sanitizing system for Sankey - Single Valve Kegs (SVK's)

The Squire 'Plus Washer' (SQPW) machine is a member of the standard by which all other semi-automatic systems are measured within the worlds craft brewing industry. With more than 350 of these systems installed worldwide in Brewpubs, Micro-Breweries, Cideries and Wineries, they are the ideal system for 25 to 30 kegs per hour output.

The SQPW is for those brewers who want to wash, sanitize, purge and counter-pressurize their kegs with CO<sub>2</sub>/N<sub>2</sub> for storage and alternative filling methods.

- **Monitors & Controls** - Via sensors and PLC computer that the washing and sanitizing (sterilizing) of kegs is completed correctly to ensure product integrity is protected.
- **Separate detergent tank** - Affords proper control over flow rate, temperature and chemical dosing.
- **Wash for stock** – Washes, sterilizes and charges kegs with CO<sub>2</sub> for long term storage.
- **Dual wash programs** – A programmed selection of washing and sanitizing options for different sized kegs and/or unfiltered products.
